INFORMATION Access in French

TOWARDS BETTER ACCESS: MCLENNAN DOES IT !

In Northern Alberta, access to health services in French is a reality thanks to the *Sacred Heart Community Health Centre* also called the *McLennan Hospital*.

Close to 30% of health care professionals working at this hospital are bilingual. This Health Centre offers access to health services to the Francophone community offering a range of services in French.

In this way, Francophone residents in this region have access to a range of primary care health services as well as mental health services in their maternal language. Francophone seniors can also have access to home care in French. Many specialized services are also available in French.

PROGRAM OF HEALTH SERVICES IN FRENCH

This program was conceived by Alberta Health Services to respond to five regional priorities:

- HELP patients navigate the health care system to orient them towards the appropriate service;
- FACILITATE the journey for Francophone patients within the health care system;
- IDENTIFY the primary health needs of the Francophone community in the region;
- PROVIDE patients with interpretive services and translations as needed;
- PROMOTE the recruitment of health care professionals capable of offering health care services in French.

A MODEL OF SERVICES IN ALBERTA

McLennan is a great model for Alberta in terms of active offer of integrated health services adapted to the needs of the Francophone population.

Entirely centered on the patient, the hospital counts on the linguistic capabilities of its human resources to provide greater access to quality health services in French.

A winning formula for the whole province!
